

Week of August 3rd Setup

In this Chart of the Week, we take a look at CrowdStrike (\$CRWD), which is rebounding from its rising trendline after pulling back from the \$210 area. The stock is now approaching key resistance at \$194.99 and \$200.67, while RSI has reset to 54.34 and is forming a hidden bullish divergence. A breakout above \$200.67 could open the door for a larger move toward \$244.46.

\$CRWD is positioned to benefit as AI agents create millions of new digital endpoints that companies must secure. Dan Ives believes cybersecurity spending could double over the next two to three years, making CrowdStrike one of the biggest potential winners from the AI-driven expansion in security demand.
